

DATA SHEET

Product overview

Name	CELT-240 (cat n. DR-589-6)
Short description	Potent hD ₂ /D ₃ dopamine receptors fluorescent ligand.
Biological description	It shows K _i = 2.34 nM and K _i = 2.14 nM for D ₂ and D ₃ dopamine receptors respectively in radioligand binding assay and selectivity over D ₄ dopamine receptor.
Biological action	No selective orthosteric ligand.
Quantity	10 µg
Purity	> 95%

Properties

Molecular Weight	1283.15
Source	Synthetic
Appearance	Purple solid
Formulation	Solid
Excitation	589 nm
Emission	616 nm
Pharmacological validation	The efficacy and potency of CELT-240 as a hD ₂ /hD ₃ fluorescent ligand was confirmed by a radioligand binding assay.

Validated Applications

Flow Cytometry	CELT-240 has been validated in flow cytometry competition binding assays using CHO-K1 cells expressing hD ₂ dopamine receptor. CELT-240 fluorescent ligand was used at 30 nM concentration.
----------------	--

Storing and Using product

Storage instructions	-20 °C (protect from light).
Solubility overview	Soluble in DMSO.

Stock solution	Add 78 μ L of DMSO to obtain a 100 μ M stock solution. We recommend not exceeding 1% of DMSO in the final assay solution.
Handling	After thawing individual aliquots for use, we recommend briefly sonicating the sample to ensure it is fully dissolved and the solution is homogeneous. We do not recommend using the product after subjecting it to repetitive freeze-thaw cycles.
Shipping conditions	The product, as a solid, is stable at ambient temperature for periods of up to a few days and does not require shipping on ice/dry ice.
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.
